Investeringspolitik
Den alternative investeringsfond investerer i lange og korte positioner i obligations- og rentemarkederne i primært Skandinavien, men også Euroland, UK og USA.
Den alternative investeringsfond søger at udnytte uligevægte i markederne gennem såvel traditionel investering i stats- og realkreditobligationer som i afledte finansielle instrumenter.
Investeringerne søges beskyttet bedst muligt ved at afdække renterisikoen helt eller delvist, samt ved at placere investeringerne i en række forskellige strategier. Bruttoeksponeringen er maksimeret til 150 gange formuens værdi.
Investeringsstrategien er aktiv. Det betyder, at der kan være markante afvigelser i afkastet i forhold til den alternative investeringsfonds målsætning.

Seneste rapportering

In March, Danske Invest Hedge Fixed Income Strategies provided a return of 1.09%. Year to date, the return is 4.47%
?
March was a negative month for risky assets with both US equities and European equities declining. There is increasing evidence of a slowdown in economic activity in the US while leading indicators for Europe has been surprising to the upside recently. The labour market remains solid in both US and Europe.

2025 has the potential to be very interesting. Market focus remains centred on new announcements from Trump on tariffs and countermeasures from in particular EU, Mexico, Canada and China. Uncertainty regarding the rate path from both the ECB and the Fed remains high.

Covered bonds, curve trades, cross-currency swaps and country spreads were all investment areas that contributed very nicely with positive performance during the first 3 month of 2025. Some of our protection trades had a more difficult start of the year and gave a negative return.

Looking into the rest of 2025, there are still many attractive investment opportunities, and the expectation is for the fund not just to reach the target return (risk-free rate + 3%-5% per year), but we find it realistic that we will outperform the target return going forward.

Geopolitically, there remains significant uncertainty, with the conflict in Israel/Gaza and in particular the Ukraine/Russia war drawing substantial attention. Tensions with China also continue to be a focal point concerning the geopolitical situation.

On the positive side, it also appears that the regulation, which regularly affects banks, continues to reduce the different banks' risk appetite. Going forward, we expect this scenario will provide us with attractive opportunities as investors.

At the end of March, the portfolio risk level (in terms of Value-at-Risk) is approximately 25% below our maximum risk limit, which is more or less unchanged since the beginning of the month.

Historical returns are not a reliable indicator of future returns. It should be noted that monthly returns (in percent) are non-additive.
